Re: Temperature Capability on Float Switch Models 9037HG & 9038CG

The Square-D float switches, Models 9037HG and 9038CG, with Form Z-20 seals are suitable to use with **media** (e.g., condensate) up to 300 °F. The viton seals are good for temperatures well in excess of 300 °F. The float and rod will also operate fine up to 300 °F.

Sincerely,

Shipco® Marketing and Sales Department
