

Isolation Valve

**FACTORY TESTED FOR LEAKS
MOUNTED BETWEEN PUMP AND RECEIVER TANK**

Efficiency

- Eliminate wasting large amounts of condensate
- Save time and money on maintenance

High Quality Construction

- All bronze construction
- “O” Ring in housing allows for thermal expansion

Adaptability

- Can be adapted to pumps of most major manufacturers
- Used only on vented atmospheric units

Easy to Use

- Replacement of pump seals made easy
- Stop pins to ensure closure
- Flow indicated by handle direction

Safety

- For lock out/tag out, a blind flange/gasket must be installed after valve
